

EVIDENCE BASED  
EDUCATIONAL CONSULTING

# For Information

## Introductory Session- *Classroom Observation APP and Coaching Professional Learning Opportunity.*

Evidence Based Educational Consulting is offering the following information session for members of School Leadership Teams.

### ***Introduction to the Evidence-Based Classroom Observation APP***

The introductory session is designed to provide information to members of school leadership teams about the Evidence Based Observation APP including background information. There is much research evidence supporting the use of this Smart Tool and how it can be used to enhance coaching and student achievement. This information will be shared and discussed during the introductory session.

The Evidence Based Observation APP uses a time sample analysis process to collect objective data about classroom interactions. The data is gathered to be used as part of in- school teacher coaching and professional development.

A member of the Evidence Based Educational Consulting team will be available to come to a venue of your choice in order to run the information session.

The information session runs for approximately three hours. The time frame allows for information sharing throughout which questions and conversations are encouraged. Registrants will be provided with limited access to the APP for the purposes of demonstration.

It is necessary for participants to have access to an iPad.

For further information about Evidence Based Educational Consulting and the EBO APP please visit [www.ebo.net.au](http://www.ebo.net.au).

**Registration-** To book an introductory information session please contact [enquiries@ebo.net.au](mailto:enquiries@ebo.net.au) or [lara.meyer@ebo.net.au](mailto:lara.meyer@ebo.net.au).
